1

I have invented and design two new version on how to open up a round circular window with the first version being able to rotate in a circular fashion on an axle. A person could buy this round circular window in a left hand version or a right hand version according ~~to~~ whether they are left hand or right hand.

The top half of the first version of the round circular window will be closed stationary and in the center half of the round circular window there will be an axle place in the middle of the window. The bottom half of the round circular window will have a hole drill through the center of the window with a plastic sleeve place in the middle and on each end of the plastic sleeve there will be a ball bearing case in place. The axle which is place in the middle of the top closed stationary round circular window when the bottom half of round circular window plastic sleeve is push on to the axle the window will rotate in a circular

And now if there is any law

And after I told MR. Maynard what changes I wanted him to do he said he will make the changes for me, so I felt incurred and I Anthony Douglas collie fax them my new invention, which is a new way to open up a round circular window which will be able to rotate in a circular fashion on an axle.

And now if there is any law in the (USPTO) that will make this law this law firm white ford taylor and preston L-L-P. resubmit my invention so that it could be fully completed, just like the other inventors ised patent. Because I have already paid this law firm to do my patent work, and they did not complete my patent work and now I Anthony Douglas collie do not have the money neither the time to do it all over again.

Very truly yours

Anthony Douglas collie
